

- A.2.1 General25
- A.2.2 Ground temperature26
- A.2.3 Heat extraction rates26
- A.2.4 Vertical bore heat exchanger27
- Annex B (informative) Standard hydraulic circuits30
- Annex C (normative) Calculation and requirements for Seasonal Performance Factors (SPF)36
 - C.1 Definitions36
 - C.2 Calculations36
 - C.3 Minimum and target SPF-values for heat pumps37
- Annex D (informative) Noise levels in the vicinity39
- Annex E (informative) Average daily tapping patterns for domestic hot water production40
 - E.1 Average daily tapping patterns40
 - E.2 Example calculation44
- Annex F (informative) Capacity control45
 - F.1 General control strategy45
 - F.2 Capacity control of the heat pump45
 - F.3 Enhanced Cycle Systems46
- Bibliography47
